AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please replace the Abstract of the Disclosure at page 21, with the amended Abstract of

the Disclosure.

ABSTRACT OF THE DISCLOSURE

A video processing method for preparing an anti-aliased foreground image for display over an image background, the method including: preparing the image background for display; generating original foreground image signals by manipulation of a contiguous group of graphics primitives; applying anti-aliasing filtering to edges of each primitive of the group of primitives to generate primitive-processed image signals; first processing the primitive-processed image signals to superpose the primitive-processed image over the image background; and second processing the original foreground image signals to superpose the original foreground image over the primitive-processed image.
